

MINI PROJECT

TOPIC: HOSTEL MANAGEMENT SYSTEM

Hostel Management System is designed for better interaction between students, hostel owners, and accounts. Hostel Management System handles all the requirements for easy Hostel Management for a college. This application will help the Hostel to centralized the activities and maintain data transparency where needed and properly store data for regular operations and future analysis.

Here students can search for the hostels listed and the owners can maintain and manage data regarding the hostel facilities and the fee billing system. So the application will be easy to use for both beginners and advanced users. It features a familiar and well thought out, an attractive user interface, combined with strong searching insertion and reporting capabilities.

Modules

Guest Login

- Search for hostel
